8	1.72	1.76	1.80	1.84	1.88	1.92

**Key**

	Profound CS loss (< 0.48)
	Severe CS loss (0.52—1.00)
	Moderate CS loss (1.04—1.48)
	and
	Normal > age 60 (1.52—1.76)
	and
	Normal middle/young adult (1.72—1.92)

Add 0.15 to values for binocular testing when two monocular values have similar contrast sensitivity.
